The **Office of University-Community Partnerships (OUCP)** engages faculty, staff, students and community partners through the integral units: campus information and visitor services; conference and event services; and community partnerships and engagement. OUCP is expanding its organizational expertise to include brokering partnerships for faculty community-based service learning and research initiatives, as well as developing processes for cataloging activities and outcomes for institution-wide community engagement initiatives.

Office of University-Community Partnerships

350 Dr. Martin Luther King Jr. Blvd., Suite 203
Newark, NJ 07102-1801
Phone: (973) 353-1630

The **Memory Disorders Project** at Rutgers-Newark is devoted to studying how the human brain creates and stores memories. Our aim is to promote increased understanding of human memory and memory impairing disorders. We are neuroscientists, psychologists, and other researchers conducting a wide range of research. Our goals include developing more accurate diagnostic tools for memory disorders, understanding how memory is disrupted in various types of disorders, and understanding the roles of specific brain structure in memory.
